1

Quickly Detect Issues in the Schools
Detect

Providing a command center with actionable insights from data collected from schools and community to build effective policies.
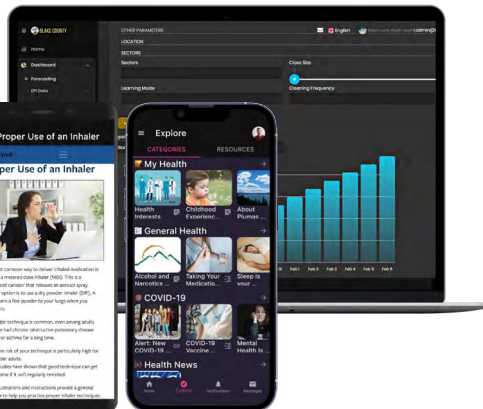

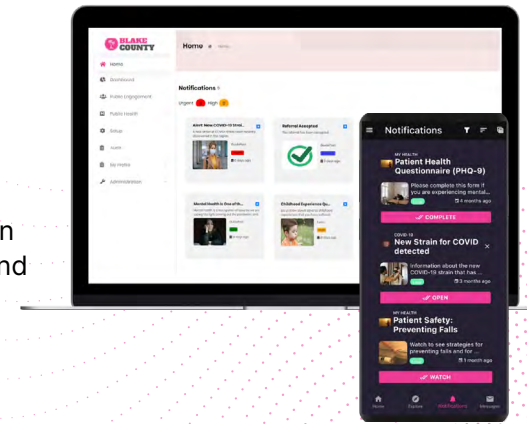

2

Respond Swiftly and Clearly
Respond

Enabling rapid collaboration between schools, student,families and public health to develop, implement and measure policies.

3

Recover and Stabalize
Recover

Obtain immunization, testing and other information to help students stay safely in schools. Delivers and helps manage approved interventions.
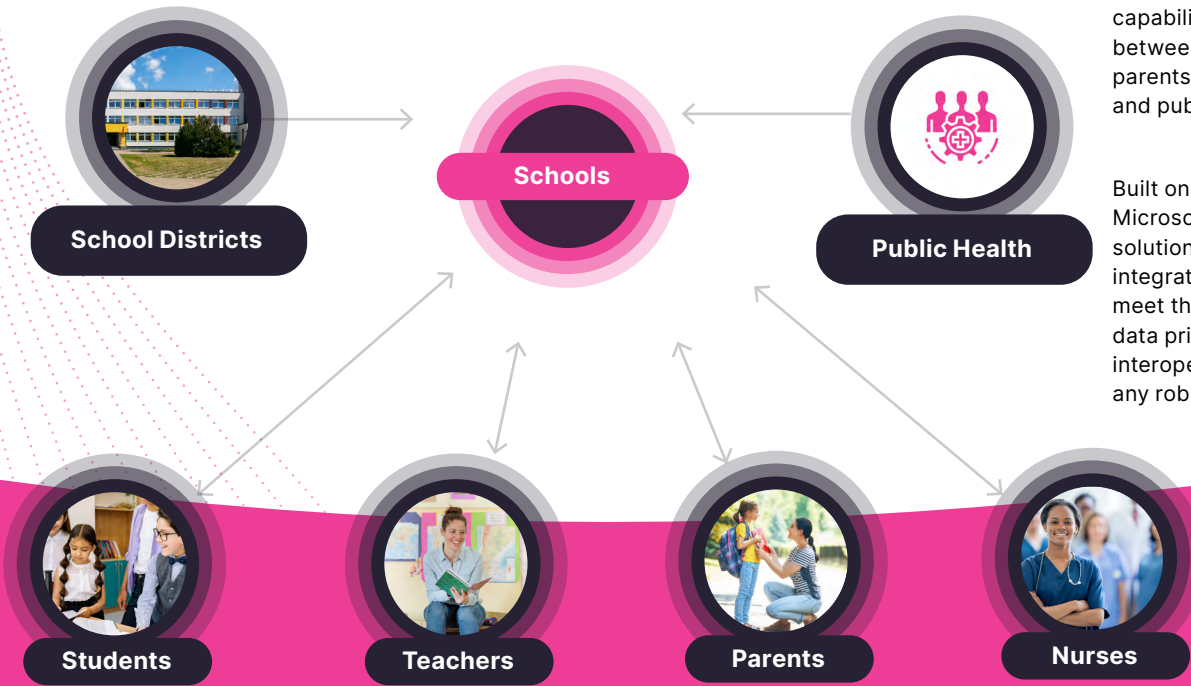

4

Prevent and Foster Healthy Lifestyle
Prevent

Empowering students with evidence-based health education and engagement.

Keeping students, teachers and staff safe and healthy by leveraging data, science, and active community collaboration.

Aztute allows you to continue using your current systems while adding crucial capabilities to enable rapid collaboration between students, staff, teachers, parents, nurses, schools, school districts and public health.

Built on the powerful and scalable Microsoft Cloud for Healthcare, our solution makes it easier to securely integrate disparate tools and data to meet the key requirements related to data privacy, security, scalability, and interoperability creating a foundation of any robust school health solution.
