## Promoting Equity: Integrating SDOH

Aztute is dedicated to advancing health equity by integrating Social Determinants of Health (SDOH) into our platform. Through sophisticated data analysis and personalized interventions, Aztute addresses the unique needs of individuals and communities. By taking a comprehensive approach to SDOH, Aztute empowers healthcare organizations to make informed decisions and foster healthier, more equitable communities.

## Aztute Precision Health Framework

Built on a cutting-edge Precision Health Framework for building safer and healthier communities, our comprehensive solution spans detection, response, recovery, and prevention, all powered by an integrated data platform. With real-time insights and proactive coordination, we enable iterative and continuously evolving health responses to stay ahead of emerging threats and enhance community well-being.

# A Modern Comprehensive Digital Health Platform

- **Consumer Education**  
Trusted, updated and expertly-vetted resources for the community
- **Data Integration & State Reporting**  
Securely share, save and integrate data to build a robust public health system.
- **Aztute Workflows and Connectors**  
Emphasizing the importance of data integration and automation in public health
- **Data Collection**  
Save time, money, and resources with efficient data collection methods.
- **Secured Document Sharing**  
Securely share confidential data across public health to better the health status of the community.
- **Population Health Management Dashboard**  
Provides comprehensive data analytics and visualization for community health assessments.
- **Community Communication & Engagement**  
Promoting two-way communication between public health and the community.
- **Care Management**  
Coordination, planning, and facilitation of healthcare services and resources to optimize patient/population outcomes.
- **Personalized Apps for Consumers**  
A system designed to meet your organization's unique needs
- **Branding**  
Customize the solution to meet your branding needs.

## Scalable Enterprise Software

Aztute offers a highly scalable and secure cloud-based platform with enterprise-grade capabilities, tailored to meet the specific needs of modernizing public health systems. Our flexible solution can seamlessly run on any cloud infrastructure or on-premises, providing the agility and adaptability required to support diverse public health environments.

## Improving Outcomes Through Data-Driven Decisions

Seamlessly connect with external systems and data sources to gain a comprehensive view of community health, enabling data-driven decision-making from a single platform. Streamline workflows, ensure real-time updates, and maintain data security to drive evidence-based interventions and improve community health outcomes.

### Integrate with :

- EMR
- Health Systems
- Care Management
- Epidemiology Data
- Health Information Exchange
- Immunization Data
- State Community Reporting
- Public Health

# Enhancing Public Health Through Integrated Collaboration

Aztute empowers seamless collaboration among community partners, providers, payers, stakeholders, and public health entities by integrating essential components into existing systems. This unified approach enables efficient data sharing, streamlined communication, and enhanced coordination, fostering a collective effort towards improved public health outcomes.
